DECYPHER

a data mining company

Customized BI Solutions for all Business Sizes

Who We Are

We are a dedicated team of developers, designers, and project managers with the shared goal of creating best-in-class solutions for our customers. Our custom applications convey meaningful analytics that allow our clients to make more strategic decisions.

We work closely with our customers to develop personal relationships so we can understand their business. Each application we build is customized for the client's individual needs with the flexibility of on-the-fly analytic tools. Through our seamless development process and team of in-house designers, we are able to deliver solutions quickly, letting our clients get back to running their business.

What We Do

• Responsive Web Applications

that clearly display the metrics you care about on any device you use.

• Automated Data Reporting

saves time by running automated reports so you can focus on running your business.

• Dashboards and Data Analysis

to easily recognize crucial data points and identify opportunities for improvement.

• Customizable Security

to make sure target audiences see appropriate data.

• Data Warehousing

to easily store all of your data and quickly retrieve the information you need.

• Customized Analytics

so you only get the features you want, and nothing you don't.

• Connect Multiple Data Sources

boosting efficiency and reducing time spent searching.

• In-House Development

making it easy to connect with someone who can help.

How We Help

Easily evaluate key performance indicators

Make more informed decisions based on data trends

Save time by combining multiple reports into a single view

Create and evaluate performance goals

Select only the data you wish to evaluate

Drill down into graphs to gain more detail

Start A Dialog
